### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Oliver T. Ong Registration No. 58,456 on February 19, 2008.

The application has been amended as follows:

Claims **36 and 40** have been amended as follows:

36. (Currently Amended) A computer-readable medium storage media having computer-executable instructions stored thereon to perform acts for a member in a group within a graph of interconnected peer nodes to renew a certificate granting privileges, the computer-executable instructions performing acts comprising:

receiving a request to renew the certificate, wherein the certificate is published in a graph database; and

performing renewal of the published certificate according to an authorization from an administrator or based on one or more security policies;

contacting one or more authorized members with a shorter chain in the graph of interconnected nodes before contacting authorized members with a longer chain in the graph of interconnected nodes; and

performing one or more renewal attempts to achieve a chain that is of shorter length, wherein number of renewal attempts are proportional to length of the chain: and if a chain is beyond a predetermined length, performing an offline renewal to shorten the chain.

Art Unit: 2136

40. (Currently Amended) A computer-readable medium storage media having computer-executable instructions stored thereon to perform acts for ensuring that a publisher of information in a record to a secure group in a graph of interconnected nodes has authority to publish to the secure group, the computer-executable instructions performing acts comprising:

creating a token for the publisher, the token containing information located in a role assigned to the publisher, the role identifying privileges of the publisher; and

matching the token against a security descriptor for the record to be published, the security descriptor providing a list of rights associated with each role, wherein the token is published in a graph database, the graph database makes available security related information including the published token to each member of the secure group;

wherein the graph database enables deferred record validation by enabling a group member to defer until required security information is available to the group member.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

Claims **22, 36** are allowed based on the following:

Prior art does not disclose wherein contacting one or more authorized members with a shorter chain in the graph of interconnected nodes before contacting authorized members with a longer chain in the graph of interconnected nodes in relationship to additional claim limitations.

Claim **25** is allowed due to allowed base claim **22**. Claim **39** is allowed due to allowed base claim **36**.

Claims **26, 40** are allowed based on the following:

Prior art does not disclose wherein the graph database enables deferred record

validation by enabling a group member to defer until required security information is available to the group member in relationship to additional claim limitations.

So as indicated by the above statements, Applicant's arguments have been considered persuasive, in light of the set of claims with limitations as well as the enabling portions of the specification. The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
